

INTRODUCING

**LuxxZr™**

HIGH AESTHETIC ZIRCONIA

LuxxZr™—our new line in solid zirconia— features pre-shaded, pre-colored discs to help deliver predictable results with every case. This is the new go-to material for all-ceramic restorations.

- ✓ **Brilliant**
- ✓ **Timeless**
- ✓ **Predictable Results**
- ✓ **High Flexural Strength**
- ✓ **Well-Balanced Translucency & Strength**

# LuxxZr™

LuxxZr™—our new line in solid zirconia—has many features the clinician will appreciate. The enamel-like translucency, coupled with innovative, multi-layered technology, plus the strength of full-contour zirconia make this the go-to for an all-ceramic restoration. While it has the strength needed for the posterior of the mouth, the material is highly aesthetic and designed to meet the functional requirements for the anterior of the mouth.
